HAPPY HANDS FOUNDATION — WEBSITE QA REPORT

Issues found during a full walkthrough of the volunteer application flow, contact page, scholars program page, and homepage sections. For the developer to fix.

Tested on: mobile (Chrome, Android) and desktop | Site: happyhandsfoundation.org

Before the individual issues: the pattern behind

Issue 1 — Contact form layout is broken

Page: Contact / "Send Us a Message" section

Problem 1 — duplicate heading: The section heading "Send Us a Message" prints twice back to back — once as a page intro, once again as the form title — with no content between them. It reads like a rendering bug, not a design choice.

Problem 2 — mismatched font: The message textarea uses a different, monospace font from every other field on the form. Name, Email, Phone, and the dropdown are all in the site's normal font; the message box looks like a stray placeholder that was never styled. This is its own bug, separate from the duplicate heading, and worth fixing even if the heading gets cleaned up.

Duplicate "Send Us a Message" heading, and the mismatched monospace textarea.

Fix needed: Remove the duplicate heading (keep one), and set the textarea's font to match the rest of the form's input fields.

Severity: **Medium — doesn't block submission, but the combination makes the form look unfinished.**

Issue 2 — Mobile layout is broken across multiple pages

Problem: On mobile, several sections don't wrap to the screen width. Content runs off the right edge instead of stacking, cutting off buttons and text. This shows up repeatedly across the site, not on one isolated page:

- Volunteer form, Step 2 (Availability & Preferences) — the "Continue to Personal Details" button is clipped on the right.
- Homepage, "Broaden Your Impact" cards — the third card ("In-Kind Giving") is cut off instead of wrapping below the first two.
- Homepage, "How We Drive Long-Term Transformation" cards — same issue, the third card ("Mentorship & Community") is clipped.
- Sponsorship "Payment Option & Summary" page — the "Sponsorship Summary" panel and its "Continue to Payment" button run off-screen.

Left to right: Step 2 form, Impact cards, Transformation cards, Payment summary — all clipped on the right on mobile.

Fix needed: Check the CSS on these sections for fixed widths or horizontal flex/grid rows that don't collapse to a single column below the mobile breakpoint. This looks like one root cause repeating across templates, not four separate bugs — worth checking whether one shared component or media query is missing.

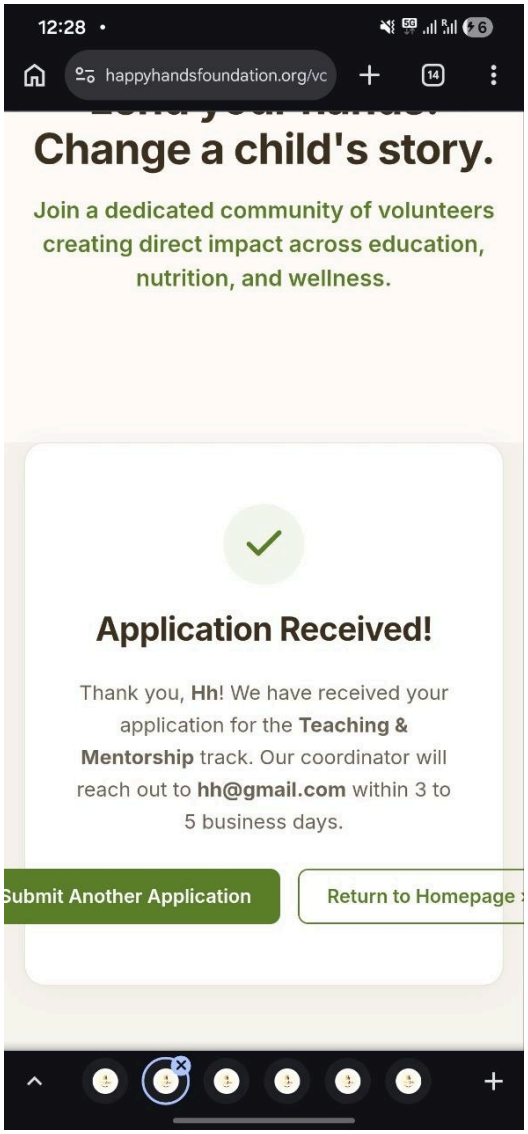

Severity: High — buttons and information become unreachable on mobile.

Issue 3 — Confirmation screen has two separate mobile problems

Page: Volunteer application — final "Application Received" confirmation screen

Problem 1 — old content bleeds through: After submitting the volunteer form, the confirmation screen loads with leftover text from the homepage hero ("...Change a child's story. Join a dedicated community of volunteers...") showing above the actual "Application Received" card. It looks like the previous page didn't fully unmount before the confirmation rendered.

Problem 2 — action buttons are truncated: Both buttons at the bottom of the confirmation card, "Submit Another Application" and "Return to Homepage," are cut off on the right edge of the screen. This is the same horizontal-overflow pattern flagged in Issue 2, showing up on the one screen every volunteer sees right after submitting.

Hero text bleeding through above the card, and both buttons truncated at the bottom.

Fix needed: Make sure the confirmation view fully replaces the previous view rather than stacking on top of it, and apply the same mobile-wrapping fix from Issue 2 to this screen's button row.

Severity: High — this is the last screen a volunteer sees, and both problems undermine trust in the submission.

Issue 4 — Duplicate section on the same page

Page: Contact / "Send Us a Message" section (same page as Issue 1)

Problem: Beyond the styling mismatch in Issue 1, the section itself appears to be rendered twice — the same heading and intro text block, one directly under the other, before the actual form starts. Worth confirming with the dev whether this is a duplicated component in the page build.

Fix needed: Confirm whether this section is included twice in the page template and remove the extra instance.

Severity: **Medium — same underlying issue as Issue 1, flagging separately since it's a duplicated component, not just a style miss.**

Issue 5 — Sponsorship Guide download is broken

Page: Scholars Program / "Become a Guardian" — "Download Sponsorship Guide" button

Problem: The download button doesn't preview the PDF first. When the file downloads, it saves as a .txt file, not a PDF — so the guide is unreadable and unusable for anyone trying to check the sponsorship packages before donating.

The "Download Sponsorship Guide" button appears on both the Scholars Program and Become a Guardian pages, but the file that downloads is a .txt, not a PDF.

Fix needed: Check the file being served at the download link — it's likely pointing to the wrong file, or the PDF was never uploaded and a placeholder text file is in its place. Also add a PDF preview or at least confirm the file type before download.

Severity: **High — this is the core call-to-action for sponsors and it doesn't work.**

Issue 6 — The bank account shown for donations is wrong

Page: Donate flow, Step 5 — "Direct Bank Transfer"

Problem: The live donation page tells donors to pay into a GTBank account (Guaranty Trust Bank, account 0625489110). The foundation's own official "Partner With Us" material lists a completely different bank — United Bank of Africa — with separate account numbers for Naira, Pounds, Euro, and USD. Whichever one is wrong, money sent to the account shown on the live site right now may not be going where it should.

Left: the account shown on the live donation page (GTBank). Right: the foundation's own official account details (United Bank of Africa) — they don't match.

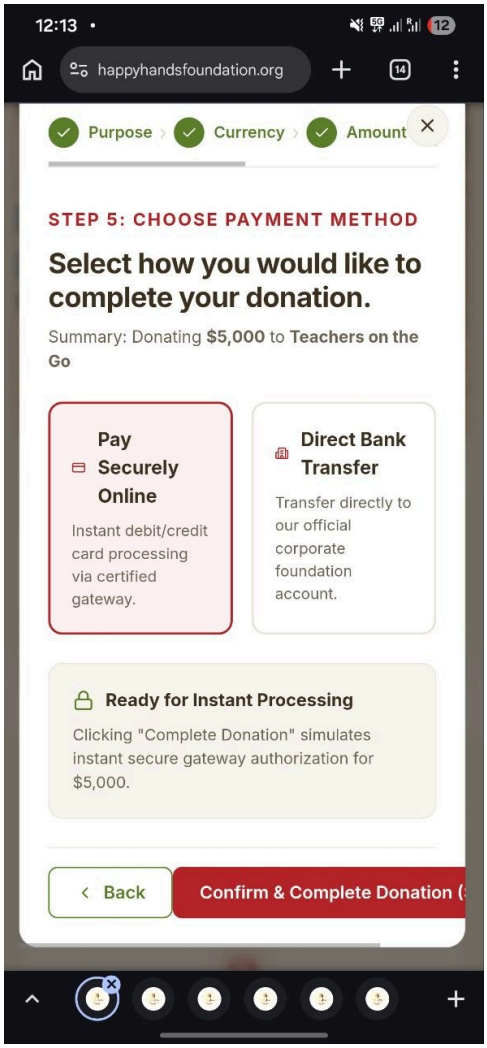

Fix needed: Confirm with the foundation which account is correct and update the live page immediately — this is a donor-facing money issue, not a cosmetic one. Also worth fixing while in there: the donor picked USD earlier in the flow, but the bank transfer screen only ever shows one Naira account, with no USD/GBP/EUR account offered even though the foundation clearly has them.

Severity: Critical — donors could be sending money to the wrong account.

Issue 7 — Test copy is showing on the live payment step

Page: Donate flow, Step 5 — "Ready for Instant Processing" notice

Problem: The box above the "Confirm & Complete Donation" button reads: "Clicking 'Complete Donation' simulates instant secure gateway authorization for $5,000." The word "simulates" is internal test/dev copy — it reads like the payment gateway isn't actually wired up, or the copy was never swapped out before launch.

"...simulates instant secure gateway authorization" — should not be visible to a real donor.

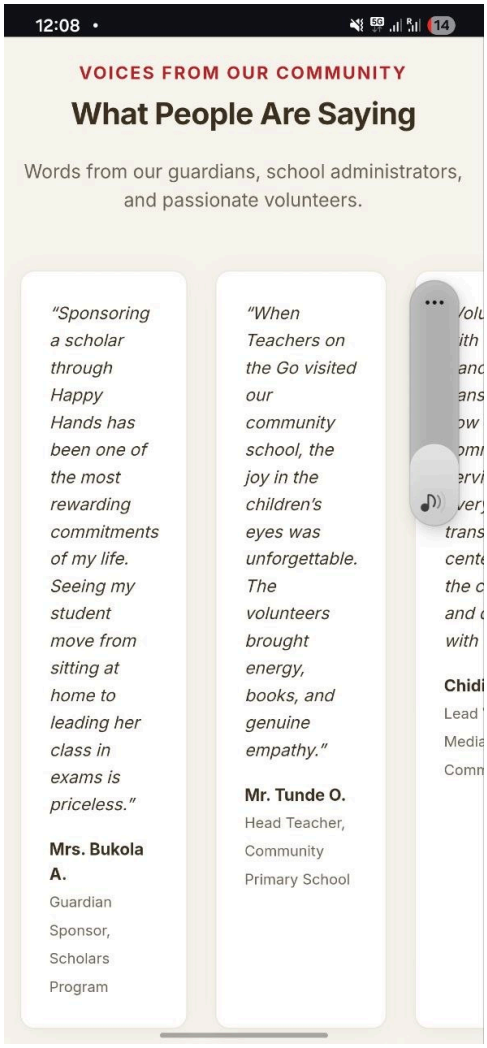

Fix needed: Confirm whether the payment gateway is actually live. If it is, replace this with real transactional copy. If it isn't yet, this page shouldn't be public.

Severity: **Critical — either misleading copy or payments aren't actually processing.**

Issue 8 — Testimonials cut off on mobile, same overflow pattern

Page: Homepage — "What People Are Saying"

Problem: On mobile, the testimonial cards run in a horizontal row and the third card is cut off at the edge of the screen instead of being fully visible or clearly swipeable. Same root cause as Issue 2 and Issue 9 — content isn't collapsing to fit the mobile screen width.

The third testimonial card is cut off at the right edge on mobile. (Note: the floating pill-shaped control visible here is the phone's own screenshot toolbar, not part of the site — ignore it.)

Fix needed: Either stack the testimonials in a single column on mobile, or turn the row into a proper swipeable carousel with a visible indicator that there's more to scroll to.

Severity: **Medium — content is reachable but the cut-off card reads as broken.**

Issue 9 — Mobile still doesn't match the design system

Problem: Taken together, Issues 2 and 8 point to the same root cause: the live site isn't following the single-column mobile layout defined in the design board (Board 08 — Responsive System). The design spec shows every section stacking cleanly at 375px width; the live pages instead keep desktop-style side-by-side rows that spill off-screen. Worth treating this as one mobile-breakpoint pass across the whole site rather than fixing each page individually.

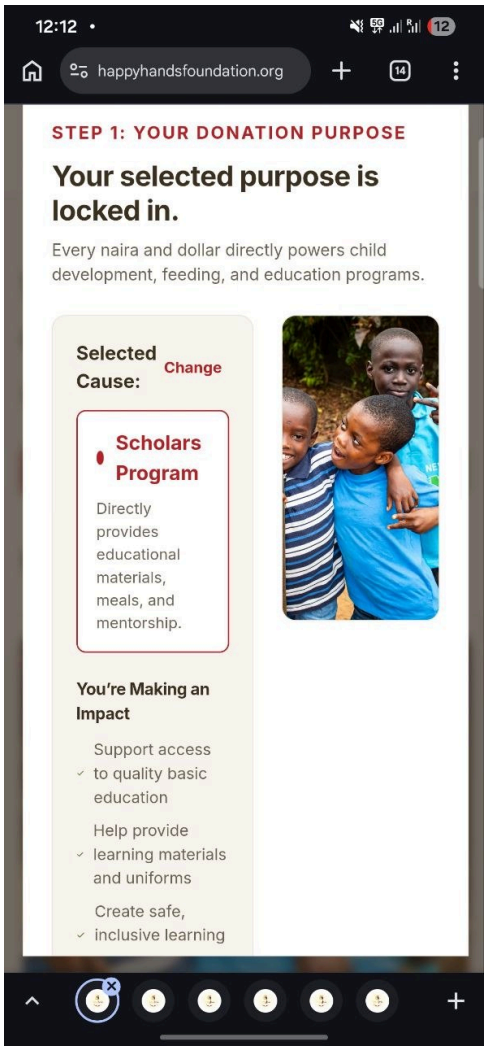

Fix needed: Re-check the CSS breakpoints against Board 08 and confirm every section actually switches to single-column below tablet width, not just the homepage hero.

Severity: **High — same root cause as Issue 2, called out separately since it's a site-wide pattern, not one page.**

Issue 10 — "Change" link on the donation purpose step is unclear

Page: Donate flow, Step 1 — "Your selected purpose is locked in"

Problem: Next to "Selected Cause," the only way to pick a different cause is a small red "Change" text link. It's easy to miss and doesn't look interactive at a glance.

The "Change" link next to Selected Cause — easy to overlook.

Fix needed: Not a bug, more a suggestion: swap this for a clearer, more standard pattern — a dropdown to reselect the cause, or a labelled "Change cause" button with an edit icon, so it reads as an action rather than plain text.

Severity: **Low — usability suggestion, not broken.**

Issue 11 — "Exit Flow" label instead of a normal close/cancel

Page: Donate flow (reported during testing)

Problem: At least one step in the donation flow labels its close control "Exit Flow" instead of a plain close (X) or "Cancel," which reads oddly mid-payment and is inconsistent with the rest of the flow.

Fix needed: Standardise the close/cancel wording across every step of the flow.

Severity: **Low — wording inconsistency, not blocking.**

Issue 12 — "Why bank transfer?" copy was rewritten, and it points to a manual process

Page: Donate flow, Step 5 — "Direct Bank Transfer"

Problem: This isn't in the design board at all as written. The board's copy is simple: "Secure and direct," "No third-party fees," "Ideal for large or international donations." The live site replaced this with different wording, and added a line asking the donor to personally email a receipt to projects@happyhandsfoundation.org so the donation gets recorded.

Left: what the design board specifies. Right: what's actually live — different wording, plus a request to manually email a receipt.

Why this matters: Asking a donor to personally email proof of payment is a manual workaround, not a real reconciliation process — someone on the foundation's side has to read every email and match it to a transfer by hand. The same concern applies wherever else the live build depends on a human checking an inbox instead of the system tracking things itself: bank transfer confirmations, volunteer applications, and contact form submissions should all land somewhere trackable (a dashboard, a database record, an automated notification) rather than relying purely on email.

Fix needed: Restore the approved copy, and separately, ask the dev what happens to a bank transfer after the donor clicks through — if the only record is an email the donor chooses to send, that's a gap worth closing before this goes further.

Severity: **High — copy drift is a quick fix, but the manual-reconciliation gap it points to is a real process risk.**

Issue 13 — The Impact page doesn't match the board either

Page: /impact

Problem: The board's Impact page opens with "Our Impact / Real stories. Real change. Lasting impact." followed straight into a Featured Impact Story card (photo, headline, short write-up, a "Read Full Story" button). The live page instead opens with an unrelated headline, "The impact of your giving," then a large, mostly empty gap, then the same four stat cards that already appear on the homepage. Featured Impact Story, More Impact Stories, and Reports & Downloads may exist further down this page, but none of it shows in what was captured here, and the top of the page doesn't resemble the board at all.

Left: the board's Impact page — headline straight into a Featured Impact Story. Right: what's live — different headline, an empty gap, then the homepage's stat cards.

Fix needed: Rebuild this page against Board 06 — correct headline, Featured Impact Story, More Impact Stories, and Reports & Downloads. Also check what that empty space between the subheading and the stat cards is meant to hold; as it stands it just looks like missing content.

Severity: High — this page doesn't deliver what the board designed, and part of it looks unfinished.

Compared against the original design board — Issues 6 through 13 above came from that comparison.
